TRANSPARENT NATIONAL BUDGET DOCUMENTS

We develop and refine logical, engaging, and accessible policy reports

Clear fiscal reporting helps the government, the legislature, investors, analysts, and the public understand the budget and grapple with policy choices. Clarity’s PFM team has managed the production of South Africa’s national budget documentation for nearly two decades. South Africa consistently ranks at the top of the Open Budget Index, which assesses global budget transparency.

Our MD works with governments on four continents to develop national budget statements, fiscal strategies and medium-term spending frameworks, fiscal risk statements, citizens budgets, and other tools.

Effective PFM communication requires a clear understanding of diverse target audiences, clear and concise exposition of technical concepts, accessible analysis, and a cogent policy narrative. Clarity Global helps our clients achieve these objectives.
